Vote!

This is a mirror of the live leaderboard created and maintained at <https://lmarena.ai/leaderboard>. Please link to the original URL for citation purposes.

Chatbot Arena (lmarena.ai) is an open-source platform for evaluating AI through human preference, developed by researchers at UC Berkeley [SkyLab](#) and [LMSYS](#). With over 1,000,000 user votes, the platform ranks best LLM and AI chatbots using the Bradley-Terry model to generate live leaderboards. For technical details, check out our [paper](#).

Chatbot Arena thrives on community engagement — cast your vote to help improve AI evaluation!

New Launch! Copilot Arena: [VS Code Extension](#) to compare Top LLMs

***Rank (UB)**: model's ranking (upper-bound), defined by one + the number of models that are statistically better than the target model. Model A is statistically better than model B when A's lower-bound score is greater than B's upper-bound score (in 95% confidence interval). See Figure 1 below for visualization of the confidence intervals of model scores.

Rank (StyleCtrl): model's ranking with style control, which accounts for factors like response length and markdown usage to decouple model performance from these potential confounding variables. See [blog post](#) for further details.

Note: in each category, we exclude models with fewer than 300 votes as their confidence intervals can be large.
